

Dr Kelvin Momanyi, the Founding Director of [Transdisciplinary Consultants](#), is a One Health specialist with professional and research experience in One Health planning, implementation, and evaluation. He currently works as a Campaign Officer at the World Animal Protection, where he delivers public facing campaigns across Africa envisioned in creating a world where respect for farm animals and nature sits at the heart of food systems. Dr Momanyi serves as an elected Board member of the Kenya Veterinary Association, a pioneer member of the Global Initiative for Veterinary Cancer Surveillance ([GIVCS](#)) and a guest lecturer at the University of Edinburgh contributing to the course integrated approaches to health. His previous work has focussed on evaluation of the implementation of One Health in Kenya; piloting an integrated surveillance system for zoonotic diseases in western Kenya under the [ZooLinK](#) project; research, advocacy and awareness creation on antimicrobial resistance, animal welfare and comparative oncology.
